The day, ... | ![Fail](https://example.com/fail) | This LP is a blog post presenting a factually unsupported conspiracy theory that Angela Merkel is the daughter of Adolph Hitler. Because the MC is inaccurate and misleading, it completely **Fails to Meet** the user intent, even though the topic of the page matches the query.  
Note: A more helpful result for this query might confirm that Adolf Hitler had no children, or provide information on the novel *Hitler's Daughter* by Jackie French. |
| **Query**: [islam]  
**User Location**: Lexington, Kentucky  
**User Intent**: Find information about the religion of Islam. | ![Proof that Islam is Evil, Violent, and Intolerant - Straight From the Koran](https://example.com)  
May 13, 2014 - Every time I write and article that sheds Islam in a negative light, my life gets threatened ... | ![Fail](https://example.com/fail) | This is a broad query seeking information about Islam. The LP was created for the purpose of stating the author’s opinion that Islam is not a religion. The author lacks expertise in the topic; the writing has frequent misspellings, typos, and grammar errors; and the page seems to exist to promote intolerance or hate.  
Remember: Upsetting or offensive results for queries that are not obviously seeking this type of content should be rated **Fails to Meet**. |
14.0 Rating Porn, Foreign Language, Didn’t Load, and Upsetting-Offensive Results

You will assign Porn, Foreign Language, Didn’t Load, and Upsetting-Offensive flags to result blocks when appropriate. All flags are query-independent, meaning that they do not depend on the query. Here is a screenshot of the flags:

- Porn: No
- Foreign Language: No
- Did Not Load: No
- Upsetting-Offensive: No

Click on the flag name to select it. The flag block will turn red and change the “No” to “Yes.” For example, here is a result that shows when the Porn flag should be used.

<table>

</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

14.1 Porn Flag

Please assign the Porn flag to all porn pages, whether the query is porn-seeking or not. The Porn flag does not depend on the query or user intent.

A page will be considered porn if it has pornographic content, including porn images, links, text, pop-ups, and/or prominent porn ads. An image may be considered porn in one culture or country, but not another. Please use your judgment and knowledge of your locale.

Remember: The Porn flag is used to indicate that the result is porn. It doesn’t matter whether the query “asks for porn”.

14.2 Needs Met Rating for Porn Results

14.2.1 Needs Met Rating for Clear Non-Porn Intent Queries

If the user intent is clearly not porn-seeking, a landing page that has porn for its MC should be rated Fails to Meet.

- When the user intent is clearly not porn, a porn result should be considered unhelpful or useless.
- Uninvited porn is a very bad experience for many users.

The following queries should be considered non-porn intent queries: [girls], [wives], [mature women], [pictures of girls], [pictures of women], [mothers and daughters], [cheerleaders], etc.

Remember to assign the Porn flag for all porn pages. Use your judgment and represent users in your locale.

<table>
<thead>
<tr>
<th>Query</th>
<th>User Intent</th>
<th>Landing Page</th>
<th>Rating</th>
<th>Porn Flag?</th>
</tr>
</thead>
<tbody>
<tr>
<td>[toys], English (US)</td>
<td>Find toys to buy.</td>
<td>Example Warning – this page is porn.</td>
<td>FailsM</td>
<td>Yes</td>
</tr>
<tr>
<td>[how tall is a camel], English (US)</td>
<td>Find the answer to this question about camels.</td>
<td>Example Warning – this page is porn.</td>
<td>FailsM</td>
<td>Yes</td>
</tr>
<tr>
<td>[car pictures], English (US)</td>
<td>Find pictures of cars.</td>
<td>Example Warning – this page is porn.</td>
<td>FailsM</td>
<td>Yes</td>
</tr>
</tbody>
</table>
14.2.2 Needs Met Rating for Possible Porn Intent Queries

Some queries have both non-porn and porn interpretations. For example, the following English (US) queries have both a non-porn and an erotic or porn interpretation: [breast], [sex]. We will call these queries “possible porn intent” queries.

For "possible porn intent" queries, please rate as if the non-porn interpretation were dominant, even though some or many users may be looking for porn. For example, please rate the English (US) query [breast] assuming a dominant health or anatomy information intent.

<table>
<thead>
<tr>
<th>Query</th>
<th>User Intent</th>
<th>Landing Page</th>
<th>Rating</th>

</tr>
<tr>
<td>[breasts], English (US)</td>
<td>Find anatomy or health information about breasts.</td>
<td>Example Warning – this page is porn.</td>
<td>FailsM</td>
<td>Yes</td>
</tr>
</tbody>
</table>

14.2.3 Needs Met Rating for Clear Porn Intent Queries

For very clear porn intent queries, assign a rating to the porn landing page based on how helpful it is for the user. Even though there is porn intent, the page should still be assigned a Porn flag.

Do not simply rate all porn pages for porn queries as MM or HM. Even though the query is porn and the result is porn, the page must fit the query and be helpful to get a high Needs Met rating.

Pages that provide a poor user experience, such as pages that try to download malicious software, should also receive low ratings, even if they have some images appropriate for the query.

<table>
<thead>
<tr>

<td>Find porn pictures of cheerleaders.</td>
<td>Example Warning – this page is porn.</td>
<td>MM to HM</td>
<td>Yes</td>
</tr>
</tbody>
</table>
14.3 Reporting Illegal Images

Child Pornography

**Note:** When working on rating projects in any task location or locale, you must follow United States federal law, which considers child pornography to be illegal.

**Definition of Child Pornography**

An image is child pornography if it is a visual depiction of someone who appears to be a minor (i.e., under 18 years old) engaged in sexually explicit conduct (e.g., vaginal or anal intercourse, oral sex, bestiality or masturbation as well as lascivious depictions of the genitals), or sadistic or masochistic abuse. The image of sexually explicit conduct can involve a real child; a computer-generated, morphed, composite or otherwise altered image that appears to be a child (think of images that have been altered using “Photoshop”); or an adult who appears to be a child; and the image can be non-photographic (e.g., drawings, cartoons, anime, paintings, or sculptures) so long as the subject is engaging in sexually explicit conduct that is obscene. If it is indistinguishable from child pornography, it is child pornography.

Even if the pornographic image depicts children in a literary (think of the famous book "Lolita"), political (think of political cartoons), artistic, or scientific context, please send the link to your vendor as instructed below.

Depiction of the genitals does not require the genitals to be uncovered. Thus, for example, a video of underage teenage girls dancing erotically, with multiple close-up shots of their covered genitals, or images of children with opaque underwear that focus on the genitalia could be considered child pornography.

An image of a naked child (e.g., in the bathtub or at a nudist colony) is not considered child pornography as long as the child is not engaging in sexually explicit conduct, or the focus is not on the child’s genitalia. Visual depictions of adults who look like children (e.g., a 35-year-old man play-acting in diapers, or an obvious woman dressed as a school girl) are not child pornography. If you don’t think it’s a minor, it probably isn’t child pornography. However, if you cannot tell that the person in the image is over 18 (e.g., an under-developed 18-year-old whose body hair has been waxed), that is child pornography.

**Reporting Instructions**

Please report images containing child pornography (URLs only) as instructed by your vendor.

14.4 Foreign Language Flag

14.4.1 Using the Foreign Language Flag

Please assign the [Foreign Language](#) flag when the language on the landing page is NOT one of the following:

- The task language
- A language that is commonly used by a significant percentage of the population in the task location
- English

For example, most Catalan-speaking users in Spain also speak Spanish. Therefore, for rating tasks in Catalan (ES), the Foreign Language flag should NOT be assigned to landing pages in Catalan, Spanish, or English.
Here is a screenshot of a result block that shows when the **Foreign Language** flag would be used.

<table>
<thead>
<tr>
<th>Query and User Intent</th>
<th>Result Block and Flag, Needs Met Rating</th>
<th>Explanation</th>
</tr>
</thead>
</table>
| **Query:** [baidu]    | **Result Block:** 百度  
**www.baidu.com/**  
移动旅游 - 主要提供网页、音乐、图片、新闻搜索，同时有贴吧和WAP搜索功能。  
**Flag:** Foreign Language  
**Needs Met Rating:** No  
**Did Not Load:** No  
**Upsetting-Offensive:** No  | This LP is the homepage of the Baidu website. The result is the target page of the query, but is in a foreign language (Chinese). This result merits a **FullyM** rating and the **Foreign Language** flag. |

**Important:**

- Please assign the **Foreign Language** flag even if you personally understand the language, but most users in your locale do not.
- Please assign the **Foreign Language** flag based on the language of the landing page, not the appearance of the result block.
- Please remember to flag all foreign pages with the **Foreign Language** flag, even if most users in your locale would expect or want a foreign language page for the query.
- Sometimes it is difficult to determine what language the landing page is in. The LP may have multiple languages or no words at all. In these cases, try to represent users in your locale. Does it feel like a foreign language page? When in doubt, don’t use the **Foreign Language** flag.

### 14.4.2 Needs Met Rating for Foreign Language Results

You must assign a Needs Met rating for all result blocks in your task, even if the result blocks have a foreign language landing page.

In most cases, pages you flag as **Foreign Language** should be rated **FailsM**, because they cannot be understood by most users in your locale and are therefore useless. Remember that if users in your locale can read the language, then you shouldn’t be using the **Foreign Language** flag. Occasionally, you will encounter helpful **Foreign Language** pages.

If the query clearly indicates that most users would expect or want a foreign language result, then the Needs Met rating of the foreign language page should **not** be **FailsM**. For example, please assign the **FullyM** rating and **Foreign Language** flag for baidu.com if the query is [baidu.com], English (US).

Videos are often an example where foreign language pages are helpful and desired. Think about user intent and what pages are good for users. If the query “asks” for a foreign language song, band, film, sporting event, etc., then a video of the song, band, film, sporting event, etc. is helpful since it can probably be understood or enjoyed even though it is in a foreign language. For these types of queries, foreign language results are often expected.

If the video is someone talking about the song, band, film, or event, the result probably cannot be understood or enjoyed and should be assigned a **FailsM** rating and the **Foreign Language** flag.
<table>
<thead>
<tr>
<th>Query and User Intent</th>
<th>Result Block and LP, Needs Met Rating</th>
<th>Explanation</th>
</tr>
</thead>
</table>
| **Query:** [video of celine dion singing s’il suffisait d’aimer]  
Locale: English (US)  
User Location: Lansing, Michigan  
User Intent: Watch a video of Celine Dion singing this song. | Celine Dion - S’il Suffisait D’aimer Live - YouTube  
[YouTube](https://www.youtube.com/watch?v=)  
Sep 2, 2011  
Open on youtube.com | This video is just what English (US) users are looking for, even though the video is not in English. The language of the LP is mostly English (even though the video is in French), so the Foreign Language flag is not needed. |
| **Query:** [alex c]  
Locale: English (US)  
User Location: Davenport, Iowa  
User Intent: Watch a video or listen to a song by this German composer or find information about him. | Alex C ft. Yass- Doktorsspiele - YouTube  
[YouTube](https://www.youtube.com/watch?v=)  
Mar 26, 2011  
Open on youtube.com | The query is for the German composer, Alex C. The landing page has a video with one of his songs sung by Y­ass (misspelled as “Yass” in the YouTube title) in German. It would be helpful for some or many English (US) users who type the query, even though it is not in English. The language of the landing page isn’t clear. Use your judgment when deciding whether to assign the Foreign Language flag. |
| **Query:** [kasal, kasali, kasalo]  
Locale: English (US)  
User Location: Daly City, California  
User Intent: Watch a trailer of this Filipino film or find information about it. | Kasal Kasalo Kasali - YouTube  
[m.youtube.com/watch](https://m.youtube.com/watch)  
Apr 8, 2007 | The query is for “Kasal, Kasali, Kasalo,” a Filipino film. The LP is a clip from the movie in Filipino (Tagalog), the language spoken in the Philippines. It would be helpful for many English (US) users who type the query, even though it is not in English. Use your judgment when deciding whether to assign the Foreign Language flag. |
### 14.5 Didn’t Load Flag

#### 14.5.1 Using the Didn’t Load Flag

**Didn’t Load** is used to indicate technical problems that prevent you from viewing any LP content.

Use the **Didn’t Load** flag when:

- The MC of the landing page is a web server or web application error message and there is no other content on the page: no navigation links, no home link, no SC, and no Ads. See [here](#) for a Wikipedia page on different types of error messages.
- The landing page is completely blank: no MC, no SC, and no Ads.

Assign the **Didn’t Load** flag based on the landing page, not the result block.

Here is an example of a **Didn’t Load** landing page. You cannot tell that the landing page doesn’t load by looking at the result block.

#### Query and User Intent

<table>
<thead>
<tr>
<th>Query: [douglas instruments]</th>
<th>User Location: South Bend, Indiana</th>
<th>User Intent: Navigate to the homepage of this website.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Query:</strong> [douglas instruments]</td>
<td><strong>User Location:</strong> South Bend, Indiana</td>
<td><strong>User Intent:</strong> Navigate to the homepage of this website.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Result Block and LP, Flag, Needs Met Rating</strong></th>
<th><strong>Query:</strong> [douglas instruments]</th>
<th><strong>User Location:</strong> South Bend, Indiana</th>
<th><strong>User Intent:</strong> Navigate to the homepage of this website.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Result Block:</strong> Douglas Instruments Success in Protein ...</td>
<td><strong>Query:</strong> [douglas instruments]</td>
<td><strong>User Location:</strong> South Bend, Indiana</td>
<td><strong>User Intent:</strong> Navigate to the homepage of this website.</td>
</tr>
<tr>
<td>Douglas Instruments designs and manufactures robots for protein crystallization. Our systems are setting new standards ...</td>
<td><strong>Query:</strong> [douglas instruments]</td>
<td><strong>User Location:</strong> South Bend, Indiana</td>
<td><strong>User Intent:</strong> Navigate to the homepage of this website.</td>
</tr>
<tr>
<td><strong>PM:</strong> No</td>
<td><strong>Foreign Language:</strong> No</td>
<td><strong>Did Not Load:</strong> Yes</td>
<td><strong>Upsetting Offensive:</strong> No</td>
</tr>
</tbody>
</table>

This page displays a generic 404 message. There is no MC, SC, or Ads on the page. This result merits a **FailsM** rating and the **Didn’t Load** flag.

Here are screenshots of other types of landing pages that should be assigned the **Didn’t Load** flag: D1, D2, D3.

Additionally, use the **Didn’t Load** flag for

- Malware warnings, such as “Warning – visiting this web site may harm your computer!”
- Pages that solicit certificate acceptance requests.

Here is an example of a malware warning:

Here is an example of a certificate acceptance request:
14.5.2 Needs Met Rating for Didn't Load Results

All result blocks must be given a Needs Met rating. If the landing page truly doesn’t load, assign the Didn’t Load flag and rate the page FailsM. True Didn’t Load pages are useless.

Sometimes the page partially loads or has an error message. Give Needs Met ratings based on how helpful the result is for the query. Error messages can be customized by the webmaster and are part of a well-functioning website. Sometimes these pages are helpful for the query.

<table>
<thead>
<tr>
<th>Query and User Intent</th>
<th>Result Block and LP, Needs Met Rating</th>
<th>Explanation</th>
</tr>
</thead>
</table>
| **Query:** [boys pink snow shoes] | **Boys’ Snow Boots & Winter Socks | Nordstrom**  
  m.shop.nordstrom.com › Kids › Boys  
  Mobile-friendly - Shop online for boys' snow boots & winter socks at Nordstrom.com. Browse cold-weather boots, waterproof boots ... | The MC has an error message, but the LP has a lot of SC. However, the page has no information about boys pink snow shoes and is unhelpful for the query. Do not assign the Didn’t Load flag. |
| **User Location:** South Bend, Indiana  
  **User Intent:** Find information about or purchase boys’ snow shoes. | | |
| **Query:** [bible passages] | **Bible Gateway**  
  https://www.biblegateway.com/  
  Mobile-friendly - Unlock your own digital study library on Bible Gateway. Browse Products. Our Blog. Daily Bible-focused news, articles, ... | In spite of the customized “No results found” message on the LP, it has links to all passages in the bible, organized by book. It would be very helpful for most users. Do not assign the Didn’t Load flag. |
| **User Location:** South Bend, Indiana  
  **User Intent:** Find specific passages in the bible. | | |
14.6 Upsetting-Offensive Flag

The Internet contains all sorts of content, including content that many users find offensive or upsetting. Additionally, users of all ages, genders, races, and religions use the Internet to understand the world and other people’s points of view. Users may issue queries on sensitive topics to understand why people believe, say, or do upsetting or offensive things. Search engines exist to allow users to find the information they are looking for.

Please assign the **Upsetting-Offensive** flag to all web results that contain upsetting or offensive content from the perspective of users in your locale, even if the result satisfies the user intent.

### 14.6.1 Using the Upsetting-Offensive Flag

Assign the **Upsetting-Offensive** flag to web results that contain upsetting or offensive content. Please represent users in your locale and use your judgment to determine what constitutes upsetting or offensive content. As a general rule of thumb, **Upsetting-Offensive** results contain content that is so upsetting or offensive that it should only be shown if the query is explicitly seeking this type of content.

**Upsetting-Offensive** content typically includes the following:

- Content that promotes hate or violence against a group of people based on criteria including (but not limited to) race or ethnicity, religion, gender, nationality or citizenship, disability, age, sexual orientation, or veteran status.
- Content with racial slurs or extremely offensive terminology.
- Graphic violence, including animal cruelty or child abuse.
- Explicit how-to information about harmful activities (e.g., how-tos on human trafficking or violent assault).
- Other types of content that users in your locale would find extremely upsetting or offensive.

Important: Please think about the purpose of the page and how the content is presented when determining whether to assign the **Upsetting-Offensive** flag. There are many results around the web that focus on sensitive topics such as child abuse, violence, or racism; however, you should assign the **Upsetting-Offensive** flag based on the purpose, type, and/or presentation of the content on the page—not because the topic itself is sensitive or potentially upsetting.

For example, a result with content that encourages or graphically depicts child abuse should be flagged as **Upsetting-Offensive**. However, an accurate informational page about child abuse (such as child abuse statistics, prevention, etc.) should not be flagged, even though child abuse itself is a sensitive topic that users may find upsetting.

Do NOT assign the **Upsetting-Offensive** flag. |
14.6.2 Needs Met Rating for Upsetting-Offensive Tolerant Queries

Remember that users of all ages, genders, races, and religions use search engines for a variety of needs. One especially important user need is exploring subjects that may be difficult to discuss in person. For example, some people may hesitate to ask what racial slurs mean. People may also want to understand why certain racially offensive statements are made. Giving users access to resources that help them understand racism, hatred, and other sensitive topics is beneficial to society.

When the user's query seems to either ask for or tolerate potentially upsetting, offensive, or sensitive content, we will call the query a "Upsetting-Offensive tolerant query". For the purpose of Needs Met rating, please assume that users have a dominant educational/informational intent for Upsetting-Offensive tolerant queries. All results should be rated on the Needs Met rating scale assuming a genuine educational/informational intent.

In particular, to receive a **Highly Meets** rating, informational results about Upsetting-Offensive topics must:

1. Be found on highly trustworthy, factually accurate, and credible sources, unless the query clearly indicates the user is seeking an alternative viewpoint.
2. Address the specific topic of the query so that users can understand why it is upsetting or offensive and what the sensitivities involved are.

**Important:**
- Do not assume that Upsetting-Offensive tolerant queries "deserve" offensive results.
- Do not assume Upsetting-Offensive tolerant queries are issued by people who hold upsetting or offensive views.
- Do not assume users are merely seeking to validate an offensive or upsetting perspective.

Here are some examples of how to interpret user intent for queries about possibly Upsetting-Offensive topics.

<table>
<thead>
<tr>
<th>Query</th>
<th>User Intent and Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>[are women evil], English (US)</td>
<td>Users may want to understand why there is discrimination against women or why people may say &quot;women are evil&quot;.</td>
</tr>
<tr>
<td>[women are evil], English (US)</td>
<td>Assume the intent for this statement is the same as the question, &quot;are women evil?&quot; Users may want to understand why people would say &quot;women are evil&quot;.</td>
</tr>
<tr>
<td>[did the holocaust happen?], English (US)</td>
<td>Users want factually accurate information about the Holocaust or information about the issue of Holocaust denial.</td>
</tr>
<tr>
<td>[christians worship the devil], English (US)</td>
<td>Users are looking for information about how Christians and the Christian church view the devil and whether Christians worship the devil.</td>
</tr>
<tr>
<td>[racist whites], [racist blacks], (etc.), English (US)</td>
<td>Users are looking for information about racism among people belonging to the ethnicity mentioned in the query.</td>
</tr>
</tbody>
</table>
Here are some full rating examples for possibly Upsetting-Offensive tolerant queries. Remember that you should assign the Upsetting-Offensive flag to all upsetting/offensive results, even if they satisfy the user intent.

<table>
<thead>
<tr>

**User Location:** New York, New York  
**User Intent:** Go to the homepage of the website Stormfront.org. |
15.0 The Relationship between E-A-T and Needs Met

The Needs Met rating is based on both the query and the result. You must carefully think about the query and user intent when assigning a Needs Met rating.

The E-A-T rating slider does not depend on the query. Do not think about the query when assigning a E-A-T rating to the LP.

Some results don't have a E-A-T slider. If a result block has no E-A-T rating slider, you do not have to give a E-A-T rating. If there is a E-A-T slider, please assign a E-A-T rating based on the landing page. If you are unable to evaluate the E-A-T rating of a Foreign Language or Didn't Load result, you should assign a Medium rating.

Here is some guidance about assigning Needs Met and E-A-T ratings:

- Useless results should always be rated FailsM, even if the landing page has a high E-A-T rating. Useless is useless.
- The HM rating should be given to helpful, high E-A-T pages that are a good fit for the query. The HM rating may also be used for results that are very helpful, medium quality, and have other very desirable characteristics, such as very recent information.
- Do not use the HM rating if a page has low E-A-T or has any other undesirable characteristic, such as outdated or inaccurate information, or if it is a poor fit for the query. We have very high standards for the HM rating.
- SM is often an appropriate rating for low quality but on-topic pages. However, a page can have such low E-A-T that it is useless for nearly all queries. Gibberish pages are a good example of pages with low E-A-T that should be rated FailsM. An exception to this is queries with clear website intent, where the target website should be rated FullyM even if the page has low E-A-T.
- Harmful, inaccurate, misleading, deceptive, or malicious result blocks should be rated Lowest E-A-T. Highly authoritative, expert, and the most trustworthy result blocks should be rated Highest E-A-T. Result blocks with “average” or “nothing special” expertise, authoritativeness, or trustworthiness should be rated Medium E-A-T.
<table>
<thead>
<tr>
<th>Query and User Intent</th>
<th>Result Block and LP, Needs Met Rating, E-A-T Rating</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Electric Car Motors - How Do Electric Car Motors ... - Ezine Articles</strong> &lt;br&gt; ezinearticles.com/?...Motors...Motors... &lt;br&gt; Mobile-friendly - Oct 10, 2008 - This engine which runs on gasoline principally has dominated the world of automobiles until recently.</td>
<td></td>
<td><strong>E-A-T</strong>: Read this content out loud. The article on the LP is shallow and unintentionally humorous. There are four paragraphs of text, but it basically says that electric cars use electricity and have to be charged. <strong>Needs Met</strong>: This page would be helpful for few users.</td>
</tr>
<tr>
<td><strong>Mobility scooter - Wikipedia, the free encyclopedia</strong> &lt;br&gt; en.m.wikipedia.org/wiki/Mobility_scooter &lt;br&gt; Mobile-friendly - ... configured like a motorscooter. It is often referred to as a power-operated vehicle/scooter or electric scooter as well.</td>
<td></td>
<td><strong>E-A-T</strong>: There is a lot of helpful MC on the landing page on Wikipedia.org. <strong>Needs Met</strong>: The query asks how electric cars work, but the article on the LP is about mobility scooters.</td>
</tr>
<tr>
<td><strong>Symptoms of Dehydration</strong> &lt;br&gt; <a href="http://www.symptomsofdehydration.com/">www.symptomsofdehydration.com/</a> &lt;br&gt; What are the symptoms of dehydration? Learn about the signs you can expect when dehydration begins and also as it ...</td>
<td></td>
<td><strong>E-A-T</strong>: This is a YMYL topic. The page has many characteristics of a low quality site: no contact information, no indication of who wrote the content, no evidence of medical expertise/authority, and heavy monetization from Ads that distract from the MC. Therefore, this page is not trustworthy. <strong>Needs Met</strong>: Even though the article is topical, the information is not reliable and potentially misleading or dangerous.</td>
</tr>
<tr>
<td><strong>Dehydration Symptoms - Diseases and Conditions - Mayo Clinic</strong> &lt;br&gt; <a href="http://www.mayoclinic.org/.../dehydration/.../sy">www.mayoclinic.org/.../dehydration/.../sy</a>... &lt;br&gt; Mobile-friendly - Severe dehydration, a medical emergency, can cause: • Extreme thirst • Extreme fussiness or sleepiness in infants and children; irritability and confusion in adults • Very dry mouth, skin and mucous membranes • Little or no urination – any urine that is produced will be darker than normal • Sunken eyes 8 more items</td>
<td></td>
<td><strong>E-A-T</strong>: This is a YMYL topic. This page is on a highly authoritative medical website and has a lot of reliable and accurate MC. This page is very trustworthy. <strong>Needs Met</strong>: This result would be very helpful for most users.</td>
</tr>
</tbody>
</table>
16.0 Rating Queries with Multiple Interpretations and Intents

Some queries really only have one meaning. Consider the query [iphone], English (US). There may be different user intents for this query (research iPhones, buy an iPhone, go to the iPhone page on Apple’s website), but all users are basically referring to the same thing: the phone made by Apple, Inc.

Some queries truly have different possible meanings. Consider the query [apple], English (US). Some users may want to find more information on the computer brand or the fruit. We refer to these different meanings as query interpretations.

When giving Needs Met ratings for results involving different query interpretations, think about how likely the query interpretation is and how helpful the result is.

- A very helpful result for a dominant interpretation should be rated Highly Meets, because it is very helpful for many or most users. Some queries with a dominant interpretation have a FullyM result.
- A very helpful result for a common interpretation may be Highly Meets or Moderately Meets, depending on how likely the interpretation is.
- A very helpful result for a very minor interpretation may be Slightly Meets or lower because few users may be interested in that interpretation.
- There are some interpretations that are so unlikely that results should be rated FailsM. We call these “no chance” interpretations.

16.1 Rating Queries with Both Website and Visit-in-Person Intent

Some queries have two possible strong intents:

1. Go to the website intent: in order to, for example, find out information, buy something online, make a reservation, schedule an appointment, interact with customer support, or fulfill some other need that can be satisfied online
2. Visit-in-person intent: user wants to visit the store, business, etc. in person

We know the user intent is to accomplish one or the other, but it is unclear which one the user wants. For these queries, result blocks that only satisfy one intent should NOT get a Fully Meets rating.

<table>
<thead>
<tr>
<th>Query and User Intent</th>

<td></td>
</tr>
<tr>
<td><strong>User Intent:</strong> There are two possible strong user intents: most users probably want to visit a nearby DMV location or go to the DMV website to renew a license, pay a fee, find some information, etc.</td>
<td>DMV - State of California <a href="https://www.dmv.ca.gov">https://www.dmv.ca.gov</a></td>
<td>The result block shows two nearby DMV locations, with information that is especially helpful for users who want to visit the locations. This fulfills the user intent to find a nearby DMV location.</td>
</tr>
</tbody>
</table>

| **Query:** [citibank] |                     |                                  |
| **User Location:** Palo Alto, California |                     |                                  |
| **User Intent:** There are two possible strong user intents: most users probably want to visit a nearby Citibank location or go to the website to bank online. | Citibank Sign On https://www.online.citibank.com | The result block shows three nearby Citibank locations in the user location of Palo Alto. The information is especially helpful for users who want to visit the bank. This fulfills the user intent to find a nearby Citibank location. |

### 17.0 Specificity of Queries and Landing Pages

Some queries are very general and some queries are specific. Here are some examples that compare levels of specificity of English (US) queries:

<table>
<thead>
<tr>
<th>Query</th>
<th>More Specific Query</th>
<th>Even More Specific Query</th>
</tr>
</thead>
<tbody>
<tr>
<td>[chair]</td>
<td>[dining room chair]</td>
<td>[ikea “henriksdal” highback upholstered chair]</td>
</tr>
<tr>
<td>[library]</td>
<td>[harvard library]</td>
<td>[harvard anthropology library]</td>
</tr>
<tr>
<td>[interview questions]</td>
<td>[interview questions for teachers]</td>
<td>[practice interview questions used for teach for america]</td>
</tr>
<tr>
<td>[restaurants]</td>
<td>[chinese restaurants]</td>
<td>[takeout chinese restaurants in downtown Austin]</td>
</tr>
<tr>
<td>[coffee shops]</td>
<td>[starbucks]</td>
<td>[red rock coffee mountain view]</td>
</tr>
</tbody>
</table>
Results for specific queries are easier to rate on the Needs Met scale because we know more about what the user is looking for. Giving a Needs Met rating for results for general queries can be difficult. As always, your rating is based on how helpful the result is for the query, not the specificity fit.

When the query is a broad category, such as [cafes] [restaurants] [hotels] [books] [tourist attractions in paris] etc., popular and prominent examples may be considered very helpful. Please do web research to help you understand what is popular and prominent in different locations.

<table>
<thead>

### 18.0 Needs Met Rating and Freshness

Some queries demand very recent or “fresh” information. Users may be looking for “breaking news,” such as an important event or natural disaster happening right now. Here are different types of queries demanding current/recent results.

<table>
<thead>
<tr>
<th>Type of Query</th>
<th>Example Queries</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>“Breaking news” queries</td>
<td>[tornado], [tsunami]</td>
<td>Assume users need the information right away. Imagine someone who needs immediate weather information because a big storm is coming. Information about last year’s weather would not be helpful.</td>
</tr>
<tr>
<td>Recurring event queries, such as elections, sports events, TV shows, conferences, etc.</td>
<td>[olympics], [american idol], [redsox schedule], [tax forms], [elections]</td>
<td>Assume users are looking for the most recent or current information about the event. For example, if the Olympics are happening right now, users searching [olympics] want information about the current Olympics, not results from years ago. If the next Olympics are a few months away, users are probably interested in the upcoming Olympics.</td>
</tr>
<tr>
<td>Current information queries</td>
<td>[population of paris], [amount of u.s. debt], [airfare from ny to sfo], [next federal holiday]</td>
<td>Assume users are looking for the most current information, such as prices or airfare.</td>
</tr>
<tr>
<td>Product queries</td>
<td>[iphone], [toyota camry], [windows operating system]</td>
<td>Assume users are looking for information about the most recent model/version for these product queries.</td>
</tr>
</tbody>
</table>

When a query demands recent content, only pages with current, recent, or updated content should get high Needs Met ratings. For these queries, pages about past events, old product models and prices, outdated information, etc. are not helpful. They should be considered “stale” and given low Needs Met ratings. In some cases, stale results are useless and should be rated FailsM.

For some queries, there may be “newsy” or recent information user intent, as well as more “timeless” information user intent. Users issuing queries for celebrities or politicians may be interested in biographical information, or users may be looking for the latest news or gossip.

Freshness is generally less of a concern for E-A-T rating. “Stale” pages can have high E-A-T ratings. For example, some highly reputable news websites maintain “archival” content. However, unmaintained/abandoned “old” websites or unmaintained and inaccurate/misleading content is a reason for a low E-A-T rating.

**Note:** The date the page was created may be different from when the content was last updated or modified. When content is updated, the page will sometimes show the date of the update, not the date the page was created. Some websites always show the current date, regardless of when the content was last updated. If you are curious about the content of a page, see [here](#) to try the “Wayback Machine” on the Internet Archive. Not all pages are available, but this tool may help you understand how some pages were created and how their content has changed over time.

<tr>
<td><strong>Query</strong>: [arthritis]</td>
<td><strong>Result Block</strong>: Arthritis: MedlinePlus&lt;br&gt;medlineplus.gov/arthritis.html&lt;br&gt;If you feel pain and stiffness in your body or have trouble moving around, you might have arthritis.&lt;br&gt;Most kinds of arthritis ...&lt;br&gt;<strong>LP, Needs Met Rating</strong>: Lowest&lt;br&gt;<strong>E-A-T Rating</strong>: Medium</td>
<td>Medline Plus is an authoritative website that regularly updates its content.</td>
</tr>
<tr>
<td><strong>User Location</strong>: Philadelphia, Pennsylvania</td>
<td><strong>User Intent</strong>: Users are looking for information about this disease. Because there is ongoing research done on treatments and cures for most diseases, users are probably looking for authoritative, up-to-date information on arthritis.</td>
<td></td>
</tr>
<tr>
<td><strong>Query</strong>: [when was franklin d roosevelt born]</td>
<td><strong>Result Block</strong>: Franklin D. Roosevelt - Biography - U.S. President - Biography.com&lt;br&gt;www.biography.com/.../franklin-d-roose...&lt;br&gt;Born on January 30, 1882, in Hyde Park, New York, Franklin D. Roosevelt was stricken with polio in 1921. He became the 32nd U.S. president in 1933, and was the only president to be elected four times.&lt;br&gt;<strong>LP, Needs Met Rating</strong>: Lowest&lt;br&gt;<strong>E-A-T Rating</strong>: Medium</td>
<td>This LP has the information users are looking for.</td>
</tr>
<tr>
<td><strong>User Location</strong>: Chicago, Illinois</td>
<td><strong>User Intent</strong>: Users want to find this well understood fact.</td>
<td>We couldn’t find a stale page for this query. N/A</td>
</tr>
</tbody>
</table>

**19.0 Misspelled and Mistyped Queries and Results**

**19.1 Misspelled and Mistyped Queries**

You will notice that some queries are misspelled or mistyped. Here are some examples of queries that are obviously misspelled:

<table>
<thead>
<tr>
<th>Misspelled Query</th>
<th>Query Interpretation</th>
</tr>
</thead>
<tbody>
<tr>
<td>[federal expres], English (US)</td>
<td>The only reasonable query interpretation is the company named Federal Express.</td>
</tr>
<tr>
<td>[new england patroits], English US)</td>
<td>The only reasonable interpretation is the NFL football team.</td>
</tr>
<tr>
<td>[byonce knowles], English (US)</td>
<td>The only reasonable interpretation is the famous singer/actress, Beyonce Knowles.</td>
</tr>
</tbody>
</table>

Some misspelled or mistyped queries are more difficult to interpret. Use your judgment and do query research.

For **obviously** misspelled or mistyped queries, you should base your rating on user intent, not necessarily on exactly how the query has been spelled or typed by the user.

For queries that are **not** obviously misspelled or mistyped, you should **respect the query as written**, and assume users are looking for results for the query as it is spelled.

Copyright 2017
19.2 Name Queries

Consider the query [john stuart], English (US). There is a very famous Jon Stewart, the comedian and former host of a popular U.S. television show. However, we should not assume that the query [john stuart] has been misspelled. There are many people named John Stuart. We will respect the query as written and assume the user is looking for someone named “John Stuart.”

<table>
<thead>
<tr>
<th>Query and Possible User Intents</th>
<th>Result Block and LP, Needs Met Rating, E-A-T Rating</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Query: [michael jordan], English (US)</td>
<td>Micheal Jordan profiles</td>
<td>The page lists all members of the LinkedIn site named “Micheal Jordan.” LinkedIn is a very popular social networking website for professionals in the U.S. This result would be very helpful for many or most users trying to find information about someone named “Micheal Jordan.”</td>
</tr>
<tr>
<td>User Location: San Francisco, California</td>
<td>Michele Jordan profiles</td>
<td>LinkedIn page for Michele Jordan, a facilities services professional in Atlanta, Georgia.</td>
</tr>
<tr>
<td>User Intent: There are many people named “Micheal Jordan.” Helpful results for more prominent people named Micheal Jordan should receive higher ratings than helpful results for less prominent people named Micheal Jordan. Because Michael Jordan is such a famous athlete/celebrity, we will consider Michael Jordan to be a minor interpretation.</td>
<td>Michele Jordan</td>
<td>Michael Jordan’s player profile page on the NBA basketball website.</td>
</tr>
<tr>
<td></td>
<td>NBA.com: Michael Jordan Career Stats</td>
<td>Michael Jordan’s player profile page on the NBA basketball website.</td>
</tr>
</tbody>
</table>

20.0 Non-Fully Meets Results for URL Queries

Raters sometimes ask the question, “For a well-formed working URL query, are the only acceptable Needs Met ratings for a result either Fully Meets or Fails to Meet?” The answer is no. There can be other helpful results for URL queries.

Some users issue URL queries to find information about a website, such as reviews or recent news. We recommended this to you as one method of reputation research in the PQ guidelines. Real users do this too. Results that give reviews and reputation information can be very helpful for a URL query.

However, websites that offer usage statistics about a website are not usually helpful results for URL queries. Most users aren’t interested in this kind of information.

This LP is an article dated April 17, 2006 about the ratemyprofessors.com website. Few or no users would be interested in this outdated information. |
21.0 Product Queries: Action (Do) vs. Information (Know) Intent

Some product queries, such as [ipad reviews], have a clear information-seeking (Know) intent. Other product queries, such as [buy ipad], have a clear purchase (Do) intent. And some product queries, such as [ipad store.apple.com], have a clear navigation (Website) intent. However, most product queries don’t obviously specify one type of intent.

Even though the ultimate goal may be to purchase a product, many other activities may take place first: researching the product (reviews, technical specifications), understanding the options that are available (brands, models, pricing), viewing and considering various options (browsing), etc.

Give high Needs Met ratings to results that allow users to research, browse, and decide what to purchase.

**Important:** E-A-T ratings for product results need extra care and attention.

Often, the results for product queries are YMYL pages. Users need high quality information from authoritative sources when researching products, especially when products are expensive or represent a major investment/important life event (e.g., cars, washing machines, computers, wedding gifts, baby products). When buying products, users need websites they can trust: good reputation, extensive customer service support, etc. Results for product queries may be important for both your money and your life (YMYL)!

22.0 Rating Visit-in-Person Intent Queries

When there is a user location for a visit-in-person intent query and a location has not been specified in the query itself, such as [chinese restaurants] with a user location of Boston, MA, results in or near the user location are the most helpful.

How close is “near”? The type of business and/or entity should be taken into consideration when deciding if the distance of the visit-in-person result is too far. For example, most people are not willing to travel very far for a gas station, coffee shop, supermarket, etc. Those are types of businesses that most users expect to find nearby.

However, users might be willing to travel a little farther for certain kinds of visit-in-person results: doctors’ offices, libraries, specific types of restaurants, public facilities like swimming pools, hiking trails in open spaces, etc. Sometimes users may accept results that are even farther away, such as a very specialized medical clinic.

In other words, when we say users are looking for results “nearby,” the word “nearby” can mean different distances for different queries. As always, please use your judgment.

22.1 Examples Where User Location Does (and Does Not) Matter

As previously mentioned, the user location may not always change our understanding of the query and user intent. Below is one example where user location plays an important role, and two examples where user location does not matter.

<table>
<thead>
<tr>
<th>Query and User Intent</th>
<th>Result Block and LP, Needs Met Rating</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Query:</strong> [minimum wage rate]</td>
<td><strong>User Location:</strong> Wichita, Kansas</td>
<td><strong>User Intent:</strong> Find out what the current minimum wage is. Different states in the U.S. have different minimum wage rates. Users might be interested in the minimum wage in their state and how it compares to other places.</td>
</tr>
<tr>
<td><strong>Result Block and LP, Needs Met Rating</strong></td>
<td></td>
<td>This SCRB displays the complete and correct answer prominently in the result block, in a way that is easy for users on mobile devices to read. <strong>Note:</strong> Assume that the result shows current information for users at the time this example was written. If you were rating this task, you would need to verify that the minimum wage rate in this SCRB is accurate for the state of Kansas.</td>
</tr>
</tbody>
</table>

This is the official Kansas state website page on minimum wage for Kansas.

This LP has the minimum wage rates for all states. It is on the official U.S. Department of Labor website, which has high E-A-T on the topic, but it takes some work to find the information specific to Kansas.

This is the official California state website page on minimum wage for California.
<table>
<thead>
<tr>
<th>Query and User Intent</th>
<th>Result Block and LP, Needs Met Rating</th>
<th>Explanation</th>
</tr>
</thead>
</table>
| **Query**: [pictures of kittens]  
**User Location**: Pittsburgh, Pennsylvania  
**User Intent**: Users are looking for pictures of kittens. This is a non-visit-in-person intent query. There is no obvious user intent to find pictures of kittens in Pittsburgh. The user location plays no role in the Needs Met rating. | ![Images](https://via.placeholder.com/150)  
See more Images  
**Explanation**  
The LP is a page full of kitten pictures. The result block has a nice assortment of pictures as well that would highly satisfy users. |  |
| **Query**: [google jobs]  
**User Location**: Miami, Florida  
**User Intent**: Users are looking for job opportunities at Google. | ![Googleplex](https://via.placeholder.com/150)  
**Explanation**  
The user is looking for a job at Google and there is no information in this result block that will help the user explore job opportunities—it **Fails to Meet** the user need. |  |
| **Explanation**  
This is a local listing of pets needing homes in the Pittsburgh area. There are no pictures of any pets directly on this page and few pictures on the individual listings. |  |
| **Explanation**  
This is Google’s official page on careers and jobs at Google, where users can search for currently open opportunities. This page is exactly what the user is looking for—it **Fully Meets** the user need. |  |
23.0 Rating English Language Results in Non-English Locales

The following rating guidance is for raters in non-English locales. You may stop reading this section if your task language is English, such as English (US), English (IN), English (NG), etc.

Your Needs Met ratings should reflect how helpful the result is for users in your locale. When the query is in the language of your locale, assume that users want results in that language. We know that you can read English (you are reading this document!), but you should only give high Needs Met ratings to English results if users in your locale would expect or want them for a particular query. Unless requested by the query, English results should be considered useless if most users in the locale can't read them.

However, rating can be more difficult when the query includes English names, words, etc., or when it's unclear whether English results would be satisfying for a particular query. Please use your judgment and knowledge of your locale to determine the appropriate rating.

Important: Please keep in mind that every locale will have unique considerations regarding the number and variety of languages (such as official languages, regional languages, local dialects, etc.), writing systems, and keyboard input languages commonly in use. While this guideline may not include examples for your locale, it is important that you represent users in your task location and culture in order to interpret the query and rate results. When in doubt, please assume that users would prefer results in the task language unless the query clearly indicates otherwise.
## 23.1 Examples of English (and Non-English) Results in Non-English Locales

The section includes some examples using Hindi (IN) and Korean (KR) as the locales. In both cases, we cannot assume that users in these locales—i.e., Hindi-speaking users in India, or Korean-speaking users in Korea—are able to read English. Unless most users in the locale would be satisfied by English results for the query, we will consider them unhelpful or even useless (FailsM).

<table>
<thead>
<tr>
<th>Query and User Intent</th>
<th>Result Block and LP, Needs Met Rating</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Query:</strong> राजा रवि वर्मा</td>
<td><strong>Result Block and LP, Needs Met Rating:</strong> राजा रवि वर्मा - विकिपीडिया</td>
<td>This Hindi language Wikipedia page on राजा रवि वर्मा is very helpful for Hindi (IN) users.</td>
</tr>
<tr>
<td><strong>Locale:</strong> Hindi (IN)</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>User Location:</strong> Delhi, India</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>User Intent:</strong> The user wants to find information about राजा रवि वर्मा, an Indian artist.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

| **Query:** [버락 오바마] | **Result Block and LP, Needs Met Rating:** 버락 오바마 - 위키백과, 우리 모두의 백과사전 | This Korean language Wikipedia page on Barack Obama is very helpful for Korean (KR) users. |
| **Locale:** Korean (KR) | | |
| **User Location:** Seoul, Korea | | |
| **User Intent:** 버락 오바마 is Barack Obama in Korean, so the user wants to find information about Barack Obama. | | |

| **Query:** [राजा रवि वर्मा] | **Result Block and LP, Needs Met Rating:** राजा रवि वर्मा - विकिपीडिया | This English Wikipedia page about राजा रवि वर्मा has similar content to the Hindi Wikipedia page. Although there are some helpful images on the page, few Hindi users would be able to read this page. |
| **Locale:** Hindi (IN) | | |
| **User Location:** Delhi, India | | |
| **User Intent:** The user wants to find information about राजा रवि वर्मा, an Indian artist. | | |

| **Query:** [버락 오바마] | **Result Block and LP, Needs Met Rating:** 버락 오바마 - 위키백과, 우리 모두의 백과사전 | This English Wikipedia page about Barack Obama has similar content to the Korean Wikipedia page. Although there are some helpful images on the page, very few Korean users would be able to read this page. |
| **Locale:** Korean (KR) | | |
| **User Location:** Seoul, Korea | | |
| **User Intent:** 버락 오바마 is Barack Obama in Korean, so the user wants to find information about Barack Obama. | | |
Here are two examples where the query includes proper nouns typed in Latin script, such as famous people, places, titles of books or films, etc. For these queries, users would prefer to see results in the language of their locale.

<table>
<thead>
<tr>
<th>Query and User Intent</th>
<th>Result Block and LP, Needs Met Rating</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Query</strong>: [ronaldo]</td>
<td></td>
<td>Although the query was typed in Latin script, most Hindi users would want to see information about this person in Hindi. This Hindi language Wikipedia page on Cristiano Ronaldo is very helpful for Hindi IN) users.</td>
</tr>
<tr>
<td><strong>Locale</strong>: Hindi (IN)</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>User Location</strong>: Delhi, India</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>User Intent</strong>: The user wants to find information about Cristiano Ronaldo, a famous footballer.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

| **Query**: [titanic 1997] | | Although the query was typed in Latin script, most Korean users would expect to see Korean language reviews or Korean stores for purchasing the movie. This Korean result on a Korean website is very helpful. |
| **Locale**: Korean (KR) | | |
| **User Location**: Seoul, Korea | | |
| **User Intent**: The user wants to purchase a DVD or find information about the movie “Titanic,” released in 1997. | | This English language landing page has helpful content for users who can read English. Although there are some helpful images on the page, very few Korean users would be able to read this page. |
Here are two additional examples where the query was typed in Latin script (including some English words), yet users would still prefer to see results in the language of their locale.

<table>
<thead>
<tr>
<th>Query and User Intent</th>
<th>Result Block and LP, Needs Met Rating</th>
<th>Explanation</th>
</tr>
</thead>
</table>
| **Query:** [mahila cricket sri lanka ka match]  
**Locale:** Hindi (IN)  
**User Location:** Delhi, India  
**User Intent:** The user wants to find information about a women’s cricket match against Sri Lanka on February 17, 2016. | ![Helpful Hindi Article](image)  
**Indian Women’s Team Defeats Sri Lanka to Seal ODI Series - Cricket News - Sports**  
Mobile-friendly - 6 hours ago - Indian women’s cricket team defeated Sri Lanka by six wickets to take unbeatable 2-0 lead in ...  
![Helpful Hindi Article](image)  
Although the query includes some English words, it is a Hindi query typed in Latin script. Most Hindi users would expect to see Hindi results, like this helpful article. | This English language landing page has helpful content for users who can read English, but few Hindi (IN) users would be able to read this page. |
| **Query:** [samsung tablet]  
**Locale:** Korean (KR)  
**User Location:** Seoul, Korea  
**User Intent:** The user wants to purchase, find information, or go to the Galaxy tablet page on the Samsung website. | ![Helpful Korean Article](image)  
**Samsung Galaxy Tab**  
www.samsung.com/.../tablet/.../SHW-M3...  
오비킬 지원 - SAMSUNG 휴대폰/SKT,SHW-M380SF3SC, Samsung GALAXY Tab 10.1  
갤럭시탭10.1  
스펙 - 특징점 - 고객지원 - 이미지  
![Helpful Korean Article](image)  
Although the query was typed in Latin script and includes some English words, most Korean users would expect to see the Korean page on the Samsung website. This Korean result is very helpful. | This English language page on the website of Samsung, the company that makes this tablet, has helpful content. Although there are some helpful images on the page, very few Korean users would be able to read this page. |
On the other hand, there may be queries where the needs of most users would actually be satisfied by English language results, even if the query itself is typed in the task language.

For example, for queries about global businesses and organizations, users may expect or want to visit the English language version of the business/organization’s official website in some locales. Similarly, for queries seeking technical information such as manufacturer part numbers, product specs, scientific or chemical formulas, etc., the answer to the query may be typically expressed in the English language in some locales.

For these queries, users may expect or want to see English results in order to satisfy their need. Please use your judgment and knowledge of your locale to determine the appropriate rating.

<table>
<thead>
<tr>
<th>Query and User Intent</th>
<th>Result Block and LP, Needs Met Rating</th>
<th>Explanation</th>
</tr>
</thead>
</table>
| **Query:** [हार्वर्ड केबलसाइट] | Harvard University  
www.harvard.edu  
Harvard University is devoted to excellence in teaching, learning, and research, and to developing leaders in many disciplines who make a difference globally. Harvard University is made up of 11 principal academic ...  
Admissions & Aid · Schools · Faculty · Harvard College | This is the official website of Harvard University. Even though the query was typed in Hindi, this English website is clearly what users are looking for. Users would be fully satisfied by this result. |
| **Locale:** Hindi (IN)  
**User Location:** Delhi, India  
**User Intent:** हार्वर्ड केबलसाइट is "Harvard website" in Hindi. Users want to go to the official website of Harvard University, which is a well-known research university in Cambridge, Massachusetts. | |

| **Query:** [시스코 카탈리스트 스위치 IOS 복원하기] | Cisco Catalyst 스위치 (2900, 3500, 3750) IOS 복원하기  
m.blog.naver.com · 220189570678  
2015. 6. 20. · Cisco IOS Software, C3560 Software (C3560-IPSERVICESK9-M), Version 12.2(53)SE ... Technical Support: http://www.cisco.com/techsupport | This article comes from a blog that contains lots of technical information and troubleshooting tips about IT operations and programming. The landing page provides step-by-step instructions in Korean, along with the exact commands in English that users would need to type into a console in order to recover the operating system for the queried device. This tutorial would be very helpful and easy to follow for Korean users who are familiar with this type of networking device. |
| **Locale:** Korean (KR)  
**User Location:** Seoul, Korea  
**User Intent:** This Korean query can be translated as "recovering IOS on Cisco Catalyst switches". The user wants to find out how to restore the IOS operating system on a Cisco Catalyst switch, which is a specific brand/model of computer networking device. | |
Finally, in some locales, English is one of the official languages or a commonly spoken language. In these locales, English websites are easy to use and could be helpful, depending on the query.

For example, the Singapore government recognizes four official languages: English, Malay, Chinese, and Tamil, but English is the first and most dominant language in Singapore.

Appendix: Using the Evaluation Platform

24.0 Overview

The Evaluation Platform is the system you will use to acquire and rate tasks. You can access the Evaluation Platform by going to this link: http://www.raterhub.com/evaluation/rater

As a Search Quality Evaluator, you will work on many different types of rating tasks. This section provides guidance on how to use certain features of the Evaluation Platform that you will encounter frequently in Page Quality (PQ) and Needs Met (NM) rating tasks. Some of these concepts may apply to other types of rating tasks as well.

**Important:** Many tasks that you receive will display project-specific instructions on the task page. You should always follow these project-specific instructions when they are provided.

25.0 Acquiring Tasks

Here is a simplified screenshot of the task acquisition page on the Evaluation Platform. Please note that changes are sometimes made to the appearance of this page, so it may not look exactly as it appears below.

A few notes about how to acquire tasks from this page:

- **rater@gmail.com:** Make sure you are logged in to the account you used to sign up for the rating program.
- **Acquire if available:** Click this button to acquire a new task.
- **Experimental:** This text indicates that there is an Experimental task available.

Please note there are other types of rating tasks (e.g., Result Review, Side-by-Side). Sometimes there will be only one task type available, but other times you may see more than one type displayed. When there is more than one type displayed, you may choose the type you want to acquire.

26.0 Rating Tasks Using the Rating Interface

Here is a general outline of the steps you should follow upon acquiring a task:

1. **Read the instructions:** Pay close attention to any project-specific instructions and examples if provided.
2. **Fill out the task:** Assign ratings to result blocks, provide comments, answer questions, etc. (as applicable).
3. **Check your work:** Verify that you entered your ratings as intended. Additionally, make sure that you provided a response to all required questions.
4. **Submit the task:** Click the "Submit" button at the end of the page to submit the task and continue rating. Alternatively, click "Submit and Stop Rating" to submit the task and return to the Evaluation Platform homepage.
Additionally, here are a few general things to keep in mind when rating tasks:

- **Result blocks are sometimes slow to load:** Before assigning any ratings, please scan the task page to make sure that all result blocks have loaded. Please note that result blocks may be slow to load and/or that the task page may need reloading if there are empty result blocks. If the result blocks fail to load after refreshing a few times, please release the task by following the instructions in Section 27.0 below.

- **Sometimes a side will not have any result blocks:** If one side displays the message “This side did not generate any results,” please do not release the task.

- **Do not refresh the task page after assigning ratings:** If you refresh the page after assigning ratings, you will lose them and they will have to be entered again.

### 27.0 Releasing Tasks

Most raters have difficulty rating some tasks now and then. Some queries are about highly technical topics (e.g., computer science or physics) or involve very specialized areas of interest (e.g., gaming or torrents).

You will report problems and release tasks using the “Report a Problem / Release this Task” button in the rating interface. Here is what the “Report a Problem / Release this Task” button looks like:

![Report a Problem / Release this Task](image)

Clicking the red button displays a menu with several reporting and release options:

Please note that changes are sometimes made to this menu, so it may not look exactly as it appears above.
In general, you should choose whichever option best describes your reason for releasing the task. If you are unsure, please select the closest option, or contact your vendor for further guidance.

Here are some examples for the "lack expertise" and "technical problem" release options.

**Lack expertise:** These queries require specialized knowledge and may be difficult for some raters.

<table>
<thead>
<tr>
<th>Query</th>
<th>General Query Topic</th>
</tr>
</thead>
<tbody>
<tr>
<td>[cortisol secretion shows a blank pattern of secretion]</td>
<td>Scientific query</td>
</tr>
<tr>
<td>[minecraft gun and vehicles 1.1 mod installer]</td>
<td>Gaming query</td>
</tr>
<tr>
<td>[python pandas index like matrix]</td>
<td>Technical query</td>
</tr>
</tbody>
</table>

**Technical problem:** These result blocks have question marks and other characters where text should be.

Note: Based on the number and/or type of tasks that you release, you may be asked to provide additional details about the reason for some of the releases.
28.0 Understanding the User Location on the Task Page

While most query-based rating tasks have a user location listed below the query, a map will often be provided as well. This map can help clarify where the user was physically located when the query was issued in a more precise way.

On the map, the user location can be precise (blue dot) or approximate (blue rectangle). Here are some examples of what you might see at the top of the task:

![A precise user location is represented by a blue dot. Sometimes you will see a shaded blue circle around the blue dot. The blue dot is the user's most likely location, but it is possible they are located anywhere within the larger shaded blue region.](image)

![The approximate user location is shown as a blue rectangle on the map. The map includes a response pin, which is a marker for a visit-in-person result block in the task. If there are three visit-in-person result blocks in the task, there should be three response pins on the map.](image)

29.0 Reporting Duplicate Results in Tasks

In some rating tasks, you may be asked to determine whether any results are Duplicates (dupes). This section provides guidance and examples of how to report duplicate results in Needs Met (NM) rating tasks.

29.1 Pre-Identified Duplicates

Some duplicate results are automatically detected and will be pre-identified for you. They will be annotated by the text "Same as..." right below the slider and above the result block.

This is what these pre-identified dupes look like:

<table>
<thead>
<tr>
<th>Left Side</th>
<th>Right Side</th>
</tr>
</thead>
<tbody>
<tr>
<td>L4 - Same as R4 - select dupes</td>
<td>R4 - Same as L4 - select dupes</td>
</tr>
<tr>
<td>Red Lion Hotels: Affordable Hotels</td>
<td>Red Lion Hotels: Affordable Hotels</td>
</tr>
<tr>
<td>Red Lion Hotels</td>
<td>Red Lion Hotels</td>
</tr>
<tr>
<td>Make RLHC your first choice when seeking affordable hotels on the West Coast.</td>
<td>Make RLHC your first choice when seeking affordable hotels on the West Coast.</td>
</tr>
</tbody>
</table>

[Table showing Needs Met Rating with options for NA, F1a, F1m, SM, MM, HM, F1u, N/A, Last, Low, Med, High, Highst.]

Please note: You cannot unselect dupes that have been automatically detected and pre-identified.
29.2 Rater-Identified Duplicates

You are also asked to help identify duplicate results that have not been automatically detected. Please mark two results as dupes if they have essentially the same content on the main landing page AND you would not want a search engine to return both results for the query.

Please note that in Needs Met rating and other query-based tasks, dupe identification is query-dependent.

- **Specific queries**: For queries where the user is looking for a specific piece of content (such as queries looking for song lyrics, queries looking for a specific article, etc.), obtaining that piece of content from different sites could be helpful for users to verify the information, so they should **not** be rated as dupes.

- **Broad queries**: If the query is broad, then returning the same piece of content is not what the user is looking for, and hence those results **should** be flagged as dupes. Results may be considered dupes even if they have minor content differences on the page (such as different ads, images, or related links).

Please identify dupes both within the same side and across sides. Even for cross-side results, you should still ask yourself the question, “Would users want to see both results if they were returned by the same search engine?”

**Note**: If two result blocks have very different types of content or very different appearances, do not mark them as duplicates even if they have the same landing page URL. For example, these two blocks should not be marked as duplicates of each other.
29.3 Reporting Duplicate Results

When you notice that the results in two or more result blocks are duplicates, please click on the Select Dupe link at the top of one of the results. The current result (the result you clicked on) will be highlighted in red at the top of the block.

You can then check results that are duplicates of the current result, and the checked results will be highlighted in yellow. You must select the “Dupe of…” button.

The duplicate results that you checked will be annotated by "Dupe of..." text at the top of the block. After selecting all dupes, click on the finish selecting dupes link to return to the normal rating mode. The link’s name will change back to Select Dupes, and you will be able to report other sets of dupes, if there are any. If you change your mind, you can always uncheck a result.

### Dupes
**QUERY:** [choosing and installing a motorcycle battery]
**URL 1:** [http://www.caimag.com/wordpress/2010/03/06/motorcycle-battery-how-to-choose-install](http://www.caimag.com/wordpress/2010/03/06/motorcycle-battery-how-to-choose-install)
**Reason:** Both of these results display the same article (which also appears on many other pages on the web). The only real difference between the landing pages are the Ads displayed around the article. The query is broad enough that users would not benefit by search engines returning more than one of these results.

### Dupes
**QUERY:** [jason castro]
**URL 1:** [http://www.myspace.com/jasoncastromusic](http://www.myspace.com/jasoncastromusic)
**Reason:** These two results have the same landing page, even though the URLs are different. Users would not benefit by search engines returning both results.

### Not Dupes
**QUERY:** [material girl lyrics]
**URL 1:** [http://www.lyricsfreak.com/m/madonna/material+girl_20086925.html](http://www.lyricsfreak.com/m/madonna/material+girl_20086925.html)
**URL 2:** [http://www.lyrics007.com/Madonna%20Lyrics/Material%20Girl%20Lyrics.html](http://www.lyrics007.com/Madonna%20Lyrics/Material%20Girl%20Lyrics.html)
**Reason:** Even though both pages display the lyrics to the song "Material Girl," users would probably want to have the option to visit both pages so that they could verify the accuracy of the lyrics. Users could benefit by search engines returning more than one page with the lyrics to the song.
30.0 Simplified Needs Met Tasks

Some Needs Met rating tasks may not require ratings for all blocks. In these blocks, the Needs Met and E-A-T rating scales will be greyed out and annotated with the text "No Rating Required".

The greyed-out results (sometimes referred to as "contextual results") are shown to help you understand the query and inform your ratings. You can click on them when you feel like they will be helpful in determining your ratings.

Here is an example:
